# Why Choose Our Coin?

We are creating a platform for people who want to build a strong community, support gamers, and help develop the largest gaming meme coin. Our mission is to cultivate a vibrant community of crypto and gaming enthusiasts.

## ABOUT US

Rocket Turtle is a new player in the world of gaming and crypto, catering to optimists who believe in the future of both industries. After our presale, we will host special events and launch a platform that welcomes all players and crypto enthusiasts. We believe in our idea of creating a platform to connect people everywhere. Join us and support our vision if you like it! We also want to create a space where you can join, chat with other players, and meet new friends!

# TURTLE COIN

## Stage 1

After each stage of our sale, we will hold special events where participants can win our coins or other exciting prizes. These events will showcase community creativity. Following the presale, we will launch a website featuring wagering games, allowing you to wager with friends or other players. You can also compete in tournaments with \$100,000 in prizes—completely free! A staking option will be available after launch to ensure fairness for all users. Additionally, the community will vote on which charitable causes to support. Our goal is to get listed on major exchanges such as Binance, Kraken, KuCoin, Bybit, Coinbase, and more. We're creating a Discord server for players who want to meet new people and chat with their opponents while playing! It's the perfect space to connect and enjoy the game together.

## Stage 2

We want the world to hear about us. We'll collaborate with influencers and streamers to promote our wagering platform. The community will

have the opportunity to vote on which influencers, gamers, and YouTubers should be invited. Voting will take place in platform X, ensuring everyone has a fair chance to influence our massive tournament.

There will also be special tournaments for streamers, influencers, and YouTubers, with each game featuring 64 competitors from these categories. The tournaments will be live-streamed, allowing everyone to watch their favorite influencers in action.

## Stage 3

To maintain balance, we will adjust staking rewards to prevent an oversupply of coins in the market. After one year, staking returns will be aligned with the global inflation rate. We are also exploring partnerships with more crypto gaming projects, introducing additional games and coins for wagering. Our focus is to get listed on more exchanges and continuously improve our platform.

New competitions will be announced every Sunday. Big monthly competitions will offer bigger prizes every four weeks, so stay tuned!

## STAKING

Staking offers 182.5% rewards in the first year, equivalent to 0.5% daily. This rate is only available for one year. Future rates will be adjusted based on global inflation to control supply. Staking will start after the presale, with details announced on our website, Twitter, and Telegram.

# Why 182.5% in the first year?

This is designed to incentivize holders and discourage early selling after the project launch.
